Purpose beats performance when it's built into every decision.

This recognition shows that long-term value, responsible innovation, and ESG done right can scale real impact not just headlines.

Well deserved.

Being ranked World's No. 1 in the S&P Global ESG Ranking 2025 for the Textile, Apparel & Luxury Goods category reinforces what has long guided us at Welspun Living, embedding responsible thinking into every decision we make.

For us, the most important stakeholder is long-term value creation. Growth matters only when it advances people, strengthens communities, and builds resilient, future-ready systems. Purpose-led leadership, responsible innovation, and deeply integrated ESG practices shape how we scale impact, always with integrity at the core.

As conveyed in our ad in today's The Economic Times, our ESG journey reflects how long-term thinking translates into measurable outcomes, from conscious manufacturing to enduring value creation.
